Ipamorelin Acetate Tri-Blend An Affordable Anti-aging Peptide Therapy

By popular demand from age management physicians nationwide, *Ipamorelin Acetate* has become available in compounded injection. Considered to be the cleanest peptide of them all, *Ipamorelin Acetate* presents significant benefits, both short term and long term in anti-aging medicine therapies.

Ipamorelin, GHRP-6 and GHRP-2 are types of GHRP (Growth Hormone Releasing Peptide) peptides that stimulate your pituitary gland to produce growth hormones. When compounded together in specific dosing, these GHRPs can help you body make more growth hormone naturally as well as block factors that hinder it's synthesis.

Teenagers and young adults have the highest amount of growth hormones, and we naturally depleted of growth hormones as we age. You have heard of Human Growth Hormone (HGH) as "the fountain of youth", so why not receive HGH directly?

First of all, HGH is very expensive, costing several thousand dollars a month. While it provides the most potent and fastest results, HGH can have many unwanted side effects, like appetite stimulation, swelling, abnormal bone thickening and cancer in some susceptible individuals. Direct HGH injection can also cause your body to stop making it's own growth hormone. So unless you can afford to spend thousands of dollars a month for the rest of your life, Ipamorelin tri-blend provides the best and safest value. Depends on your current hormone status and personal goals, this tri-blend peptides cost around \$500 to \$900 monthly. Most people report results within a few months, with the majority chose to continue once they experience how well they feel.

Patient's Testimonies: "Anti-Aging Peptide Therapy -

"I've had great results from the peptide therapy Dr. Henry has provided me. I have an overall feeling of enhanced wellness - I am more rested. I sleep better and my recovery from workouts is more efficient. I have less joint pain. My skin and hair also feel better. It's a great feeling to work with a Dr. who truly understand my needs and thinks of individualized treatment to help me reach my goals"
